MINI MAGNIFYING GLASS

Tooling:

A-Mandrel
#1A Bushing
J Bit

Cutting and Turning

- Cut wood length of tube or a little longer to square off.
2. Using 7mm pen bushing (1A) you can make 3-4 blanks at a time.
 3. Turn to bushing or desired size.
 4. Sand and polish.

ASSEMBLY

1. Push finial into one end of blank.
2. Push hilt of glass holder into other end.
3. Put magnifying glass into groove of glass holder.
4. Screw glass holder into threaded end of hilt.
5. Thread chain through hole.

Helpful Hint: If glass is not tight use a very small bead of super glue in groove of glass holder.
